Arnheim Apr 22 2020 Rudolf Arnheim's great forte is his ability to illuminate the perceptual processes that go into the making and reception of artworks--painting, sculpture, architecture, and film. Over the years, his pioneering mode of "reading" art from a unique scientific/philosophic perspective has garnered him an established and devoted audience. That audience will take pleasure in Arnheim's most recent collection of essays, one that covers a range of topics and includes titles such as "Outer Space and Inner Space," "What Is an Aesthetic Fact?," "As I Saw Children's Art," "Two Ways of Being Human," "Consciousness--an Island of Images," and "From Chaos to Wholeness." The notion of structure is Arnheim's guide in these explorations. Most of the essays examine the nature of structure affirmatively: how it comes about, its incentives and objectives, its celebration of perfection. He is interested in how artists grope for structure to shape powerful, enlightening images, and how a scientist's search for truth is a search for structure. Writing with enviable clarity, even when deploying complex arguments, Arnheim makes it easy and exciting to follow him as he thinks. America is not abundantly supplied with "public intellectuals" such as Rudolf Arnheim--to have his writings with us is cause for celebration. "The word 'structure' appears for good reason in the title of this collection. . . . Structure seems to be needed as an arbiter wherever this civilization of ours is split by selfish interests and fighting for either/or decisions. The essays want to speak with the voice of reason, because they want to show how the parts require the whole." *Guide Pratique de la Consultation En Gériatrie* Jul 18 2022 Le vieillissement de la population confronte de plus en plus le praticien aux patients particuliers que sont les sujets âgés. Outre l'examen clinique traditionnel, l'évaluation gérontologique standardisée (EGS) doit rentrer dans la pratique courante de tout généraliste. Cet examen permet d'évaluer l'ensemble des fonctions cognitives, sociales, et l'autonomie fonctionnelle d'un patient. À l'aide des nombreux tests courts et pratiques de diagnostic, cet ouvrage permet au praticien de suivre l'évolution physique et psychique des personnes âgées. Il propose tout d'abord un examen clinique spécifique (évaluation cognitive, thymique, nutritionnelle, de l'équilibre et de la marche, évaluation fonctionnelle et de l'autonomie), puis un état des lieux des pathologies gériatriques, des pathologies neurodégénératives et des troubles du comportement. Cette nouvelle édition présente notamment les outils opposables à PATHOS (outil d'évaluation des états pathologiques en EHPAD) et propose des tests plus spécifiques à l'attention des sujets fragiles afin de dépister suffisamment tôt cette fragilité et un certain nombre de déficits pour mettre en place des attitudes de prévention, de traitement et de prises en charge efficaces. Ce guide s'intègre parfaitement dans la pratique des médecins généralistes, des médecins coordonnateurs en EHPAD et de tous les praticiens dans le suivi de leurs patients âgés. Cet ouvrage propose tous les outils de diagnostic pour aider le médecin généraliste à suivre l'évolution physique et psychique des personnes âgées (+ de 70 ans), évaluer leur degré de dépendance et

répondre aux questions que leur suivi suppose. Il s'agit également d'aider le praticien à entrer en contact avec son patient pour mieux le comprendre et mieux communiquer. Pour cette nouvelle édition: - ajouts de nouveaux outils de diagnostic: protocoles; - mise à jour des références et des consensus.
